REACH/ SVHC

European Regulation EG 1907/2006

On October 28th 2008, the European Chemicals Agency (ECHA) published the candidate list of substances of very high concern (SVHC) for the first time. We would like to inform you that ECHA published on the candidate list of substances of very high concern (SVHC) dated **June 27th 2024**. In this connection, substances were added to the candidate list.

In terms of this regulation, we act as a downstream user and importer.

We hereby confirm that our delivered products do not contain any substances of very high concern (SVHC) of the candidate list above 0.1% according to Art. 33 of the REACH Regulation (EC No. 1907/2006). (Basis: SVHC list of the ECHA, to be viewed at <http://echa.europa.eu/web/guest/candidate-list-table>). This includes the substances listed in Annexes XIV and XVII of the Reich Regulation.

However, the presence of traces in concentrations below the permissible limits cannot be excluded.

The following products are an exception to this:

- Semperit (E630 and E2514)
- Frenzelit (ISOPLAN ® 1100):

In this context, we would like to point out that we do not have to prepare a chemical safety report and refer to Part 4, Article 37, Paragraph 4c of the above-mentioned Regulation. This states that if less than 1 ton is used per year, there is no obligation to report. In our company, considerably less than 1 ton is processed per year.

Furthermore, we inform you that the black materials distributed by us and used for further processing (with the exception of Semperit qualities E9568 and P9541) contain traces of substances as impurities which restrict their use to applications for products which are not marketed to the general public and which do not come into direct, prolonged or repeated contact with the human skin or oral cavity for a short period of time during normal or reasonably foreseeable use.

WICHTIGE HINWEISE: Die genannten technischen Daten wurden an Standardmaterial unter Laborbedingungen ermittelt. Eine Eigenschaftszusicherung kann aus den genannten Angaben nicht abgeleitet werden. Bei der Vielzahl möglicher Einbau- und Betriebsbedingungen kann daraus keine Gewährleistung für das Verhalten einer Dichtverbindung abgeleitet werden und es liegt in der Verantwortung des Anwenders, die Materialauswahl in einer spezifischen Anwendung zu testen, um seine beabsichtigte Einsatzfähigkeit zu ermitteln. Produktänderungen, die dem technischen Fortschritt dienen, behalten wir uns vor.
Dieses Dokument wurde maschinell erstellt und ist auch ohne Unterschrift gültig.

IMPORTANT INFORMATION: The listed test values and data are based on results tested on standard material in laboratories. A characteristic warranty cannot be derived from the given information. Referring to the multitude possible functions, it is the user's responsibility to test and ascertain the selection of material for its intended operational capability. Rights reserved to alter products with the scope of technical progress and development.
